Re: Review of wetland setback for development off Fieldside Lane, Wells

Dear Mr. Wood;

I have field reviewed the wetland at the northeast corner of your proposed development. As indicated earlier this wetland is a forested wetland with trees 6 – 10 inches in diameter and 40 – 60 feet tall.

I also have reviewed the aerial view of the area northeasterly of your northeast corner and it is my professional opinion that the unforested wetland which is on the Town Map lies greater than 250 feet northeasterly of your property.

If you have any questions, please contact me at the above numbers.

Sincerely,
Kenneth Gardner
