Recommendations and Conclusion:

1. The Staff Review Committee should consider receiving the site plan amendment application.
2. The SRC should review and workshop the V, VI, VII and completeness draft comments and consider the following issues:
 - a. The landscaping/ screening requirements:
 - i. A 15' landscaped buffer shall be maintained along Route 1. This buffer shall consist of grass, two lilac shrubs, and other shrubs.
 - ii. A residential subdivision exists to the north of this parcel. No screening exists on this parcel for the residential use. The subdivision, as part of its Multifamily Development buffer requirements, has a row of arborvitae plantings along its lot line. **SRC to determine what screening this commercial property is required to install along this northerly lot line.**
 - iii. The westerly lot line has existing vegetation. This treeline shall be maintained. **The SRC to consider finding this vegetation to remain sufficient for the westerly residential abutters.**
 - iv. The southerly lot line abuts a residential use. Prior approvals required parking spaces to be a minimum of 15' away from the lot line. Proposed parking shall be 15' from the abutting lot line. Parking shall be screened from the view of the southerly abutter by a 6' tall solid fence. **SRC to determine if the proposed fence shall satisfy the screening along the southerly lot line.**

- b. Consider not requiring an updated boundary survey as not building additions or new structures are proposed.
- c. Consider not requiring updated capacity letters from the WSD or KKWWD. No changes in use are proposed.
- d. Consider finding the application complete
- e. Consider finding the application compliant
- f. Consider approving and signing the Findings of Fact & Decisions and site plan.
