Re: Wetland Delineation, 30+ acre parcel Meetinghouse Road Wells, ME

Dear Walter,

I have completed a wetland delineation on the 30+ acre parcel located on Meetinghouse Road Wells, ME. The wetland delineation was completed in accordance with the 1987 U.S. Army Corps of Engineers Wetland Delineation Manual and the Regional Supplement to the Corps of Engineers Wetland Delineation Manual for the Northcentral and Northeast Regions dated January 2012. These manuals require the presence of three parameters for a wetland to be present, wetland hydrology, hydrophytic vegetation, and hydric soils.

The wetlands I found on the parcel were flagged with yellow flagging. The flagging was labeled in an alphanumeric sequence. The wetland flags were located by gps equipment capable of locating a point to within three feet. The wetland data has been forwarded to your office. The wetlands found onsite are forested wetlands. The wetlands on the parcel are related to drainage moving across the site from the north to the south. The wetlands on the parcel located adjacent the stream and to the Merriland River will meet the definition of wetlands of special significance as defined by Maine Department of Environmental Protection.

If you have any questions or require additional information, please contact me.

Sincerely,

Mark J. Hampton C.S.S., L.S.E.
Certified Soil Scientist #216
