Hi Thomas:

It was very cold but we held the site walk on Saturday morning as scheduled. No abutters were there so we are glad you followed up with an e-mail.

See attached portion of the site plan with the playground highlighted. We thought the existing arborvitae looked healthy but had some gaps so the proposed fence and/or plantings will be extended to wrap around the back corner of the playground more. The fence will be a 6 foot tall solid fence, probably white vinyl or possibly wood.

Hope this information is helpful, thanks.

Michael G. Livingston, PE
Town Engineer/Town Planner

Question / Comment	<p>I left a voice message today about a site walk which I thought was being held today per information given to me by my neighbor. Now that I am on the town website I see it was for this past Saturday. The rear of my house abuts the rec center where there is a proposal for a day care center and playground. My neighbor and I wanted to see where the town property ends and ours begins and to find out the type of fence and tree barrier that is being considered. Please advise me if possible. We really don't want to have to look at the unsightly type of fence behind the new police department with all that green plastic if possible. Thanks for whatever information you are able to provide.</p>
