Question / Comment  
I am writing to contest the proposed 20 house subdivision on  
Chick Crossing Road.

One of the great parts of living here is that we are not packed in on top of each others. However over the last few years it seems that everywhere you can fit houses they are going up. When is it going to be enough. As a former call force firefighter in town I know that there has been questions and concerns over the amount of available coverage based manpower and equipment. I have no lack of faith in our first responders, but there has to be a reasonable expectation on just how much they can do.

When we bought our house in 2011, we received information about the concern for the water way and the water shed area behind our houses on Chick Crossing. There is abundance of wildlife that lives in this area and to build a large subdivision will only cause more complicated problems as we further encroach on their habitat.

When I saw the surveyors truck I was in hopes it was that someone was going to build a single family home. That would have helped to contain the ever expanding growth. Sadly that is not the case. With all the building going on around the town, the beauty and serenity of Wells is being ruined.

Sincerely,  
Kevin & Amy Prouty
