Hello. I live on Chick crossing near where the new 20 home development is planning on being built. Is there anything we can do to stop this development from happening or lessen its impact on our town and more specifically, my neighborhood? I moved here 3 years ago knowing this area was rural, quiet, and safe.

Adding 20 cookie-cutter homes will severely harm the identity, peace, safety, and affordability of the area for its current residents. The impact of introducing at least 40 cars to the area (2 average per house) will add an immense amount of noise and pollution to the neighborhood.

My husband and I go around our neighborhood once a year and collect trash from the side of the roads and yet every year there is more to be collected. This will no doubt increase with adding 20 homes.

Not to mention the even larger impact it will have on the environment here. We have so much wildlife here that we are bottle-necking with all this development. On top of that, can we sustain such a development with the aquifer that it will literally be on top of?

Can we petition to have this land be protected?
